

QUICK INSTALL GUIDE

Read before installing

STEP 1: Gently plug in USB **without** pushing to be flush. Charge light to full capacity with light turned **OFF**. Approximately 12 hours to fully charge.

Gently insert **just enough** so that light will come on

STEP 2: Test brightness settings. Slide button left and right for high and low brightness. Center position to turn off.

STEP 3: Place base on desired wall location. With a level on the base mark the drill holes on the wall. Remove base and screw in drywall anchors. Place base on the wall over drywall anchors and install screws provided. Be sure screws are fully screwed into base so that the magnetic arm is flush when attached.

Use **both** drywall anchors provided

STEP 4: Insert the magnetic arm into the hole on the base to connect.

STEP 5: With one hand on the base, use other hand to pull the magnetic arm directly away from base without twisting for easy dismount.
